PROFESSIONAL SUMMARY:

Software Engineer with 1+ year of experience developing scalable web applications using Angular, Laravel, PHP, JavaScript, and Python. Experienced in building AI-powered applications using Claude AI, Gemini, LLMs, LangChain, and Prompt Engineering. Skilled in REST API development, full-stack application development, and AI-assisted software engineering with a focus on delivering scalable, user-centric solutions.

PROFESSIONAL EXPERIENCE:

Software Engineer | Table Top Technologies

Apr 2025- Present

- Developed and optimized backend services using PHP, Laravel, and REST APIs, improving API performance and data processing efficiency by 40%.
- Enhanced legacy Angular modules, reducing page load time by 25% and improving application responsiveness.
- Leveraged Claude AI across 10+ feature implementations for code generation, debugging, refactoring, documentation, and rapid prototyping.
- Collaborated with cross-functional teams to deliver production-ready features, reducing reported defects by 25%.

PROJECTS:

OmniTrace - AI Trading Coach

July 2026

- Engineered an AI-powered trading assistant integrating Claude AI and Gemini, enabling 20+ natural language trading workflows for beginner investors.
- Integrated 5+ REST APIs, including broker connectivity for paper trading, live order execution, portfolio synchronization, and real-time market insights.
- Delivered a functional MVP within an organization-level hackathon, implementing AI-driven trading workflows, broker integration, and conversational AI for beginner investors.

AI Document Assistant - [Python|LLM|LangChain|NLP] [\[Link\]](#)

Feb 2024-Apr 2024

- Built an AI-powered document assistant that increased document processing capacity by 50% while reducing response time by 30%.
- Implemented LangChain and LLMs to answer PDF-based queries with 95% accuracy.
- Optimized document processing using parallel execution techniques to improve scalability and performance.

Real-Time Weather Insights Dashboard-[JavaScript|HTML|CSS|Python|Django|SQL]

May 2023-July 2023

- Created a real-time analytics dashboard that increased user engagement by 40% and improved operational efficiency by 20%.
- Automated weather data collection and visualization, reducing manual effort by 30% through scalable data processing.

HACKATHONS & ACHIEVEMENTS:

Organization-Level Hackathon Winner | Table Top Technologies

July 2026

- Secured 1st place in the organization-level hackathon as part of a 2-member team by developing OmniTrace, an AI-powered trading assistant using Claude AI and Gemini.

GDG Hyderabad Agentathon 2025 - Guinness World Record Hackathon

December 2025

- Participated in the GDG Hyderabad Agentathon, a Google Labs, GDG Hyderabad, and EPAM Systems Agentic AI hackathon recognized by Guinness World Records, collaborating with 2,000+ developers to build AI-driven solutions using LLMs, Prompt Engineering, and modern software development practices.

TECHNICAL SKILLS:

- **Languages:** JavaScript, Python, PHP, SQL, HTML, CSS, C
- **Frameworks :** Angular, Laravel, Django, Bootstrap, jQuery
- **AI & Generative AI :** Claude AI, Gemini, Prompt Engineering, LLMs, LangChain, NLP, Generative AI
- **Tools:** Git, GitHub, SDLC, REST APIs, VS Code

EDUCATION:

University College of Engineering Narasaraopeta JNTUK, India

Feb 2021-May 2024

- Bachelor of Technology in Computer Science & Engineering
